
I'm a 2nd-year B.Tech CSE (Cybersecurity) student at SRM Institute of Science and Technology with a CGPA of 8.75. I've worked on hands-on projects like a Java-SQL House Rental Management System (as team lead), an AI-based Password Strength Analyzer using Flask, and a DBMS-driven Campus Marketplace platform. I'm comfortable with C, C++, Java, HTML, CSS, and MySQL, and currently learning full-stack web development to expand my practical skills. I'm passionate about cybersecurity and always looking for ways to apply my learning to real-world challenges. This internship is a chance for me to grow, contribute meaningfully, and gain valuable experience in a professional setting.
